

19th Symposium on Information, Control and Optimisation Problems in Manufacturing

INCOM 2027

« AI and digital technologies for resilient and sustainable production and logistics »

BECOME AN INDUSTRIAL SPONSOR

INCOM is one of the most renowned international conferences in manufacturing, operations, and logistics systems. Organized every three years by the International Federation of Automatic Control (IFAC), it serves as a major forum for exchanges between academia and industry. Following the Vienna edition in 2024, INCOM 2027 will make its long-awaited return to France, where it has not been held since 2006.

Celebrating the 50th anniversary of the INCOM conference, INCOM 2027 will place a special focus on AI and digital technologies for resilient and sustainable production and logistics, bringing together leading researchers and practitioners from around the world to shape the future of industry.

Sponsors and exhibitors at INCOM 2027 will benefit from outstanding visibility among industrial professionals, academics, engineers, decision-makers, and students involved in and interested in advanced manufacturing, logistics, automation, artificial intelligence, and digital technologies.
